

EPRV x Solar Physics Workshop – Day 1

Time Pacific US / UTC	Talk Title	Speaker
8:00a / 3:00p	Welcome & Workshop Goals	Jennifer Burt [JPL] & Heather Cegla [University of Warwick]
8:05a / 3:05p	The headache of solar/stellar variability for planet hunters	Annelise Mortier [University of Birmingham]
8:30a / 3:30p	Overview: Solar Data for EPRV Studies	Bill Chaplin [University of Birmingham]
9:00a / 4:00p	Looking at the Sun through ESPRESSO - the PoET solar telescope	André M. Silva [University of Porto]
9:15a / 4:15p	Polarimetric Sun-as-a-star observations with ABORAS in the search for Earth-sized exoplanets around Solar-type stars	Kiran Jhass [University of Birmingham]
9:30a / 4:30p	Estimation and statistics of Solar filament mass based on CHASE Sun-as-a-star spectroscopic data	Tianyi Xie [Nanjing University]
9:45a / 4:45p	DKIST Overview	Serena Criscuoli [National Solar Observatory]
10:05a / 5:05p	Radial velocities from a spatially resolved sunspot library	Amy Goodsall [University of Göttingen]
10:20a / 5:20p	Group Discussion / Additional Q&A	All

Wednesday, June 10th, 2026

8:00 – 10:30a US Pacific

3:00 – 5:30p UTC
