

EPRV x Solar Physics Workshop – Day 2

Time Pacific US / UTC	Talk Title	Speaker
8:00a / 3:00p	Welcome Back	Jennifer Burt [JPL] & Heather Cegla [University of Warwick]
8:05a / 3:05p	Next generation Ground based solar Observing Network (ngGONG)	Alexei Pevtsov [National Solar Observatory]
8:25a / 3:25p	HARPS and HAB: Sunrise III data release, a HARPS-N quiet Sun Benchmark, and future solar minimum opportunities	Malcolm Druett [University of Sheffield]
8:45a / 3:45p	Sun-as-a-Star Studies: Magnetic Variability and Spectral Signatures Using a Decade of HARPS-N Disc-Integrated Spectra	Parvathy Menon [Indian Institute of Astrophysics]
9:00a / 4:00p	Decoding the Radial Velocity Signatures of Solar Faculae with 3D MHD Simulations	Florian Kröll [University of Graz]
9:15a / 4:15p	Solar Dynamics Observatory Overview	TBD
9:35a / 4:35p	Center-to-limb variations of solar active regions, observations of spots, faculae, and network in the 6173 Å continuum	Alex Pietrow [Leibniz Institute for Astrophysics]
9:50a / 4:50p	EVE Sun-as-a-star mHz continuum	Hugh Hudson [University of Glasglow]
10:05a / 5:05p	Reversed-C Solar Line Bisectors, and Implications for EPRV	Drake Deming [University of Maryland]
10:20a / 5:20p	Group Discussion / Follow On Plans	All

Thursday, June 11th, 2026

8:00 – 10:30a US Pacific

3:00 – 5:30p UTC
